is real

Real customers start with real emails. Real emails start with BriteVerify.

validity.com

The simple solution to improve email deliverability

User friendly design meets enterprise ready technology to give you all the tools you need to eliminate bounces and increase revenue.

Real-time email verification API

Never turn a misspelling into a missed customer. Our Real-Time APIs and tools ensure data entering your systems is correct as the customer types.

Part of Validity Connect

See what happens when industry-leading data cleansing and verification tools are brought together. It's a powerhouse in data quality assurance.

Real-time email list verification

Ensure that your new and existing marketing lists are clean and valid before you send. Simply drag and drop your list, or integrate with your ESP of choice.

Salesforce integration with Validity Verify

Validity Verify allows for on-demand, real-time email verification within Salesforce Lightning Experience.
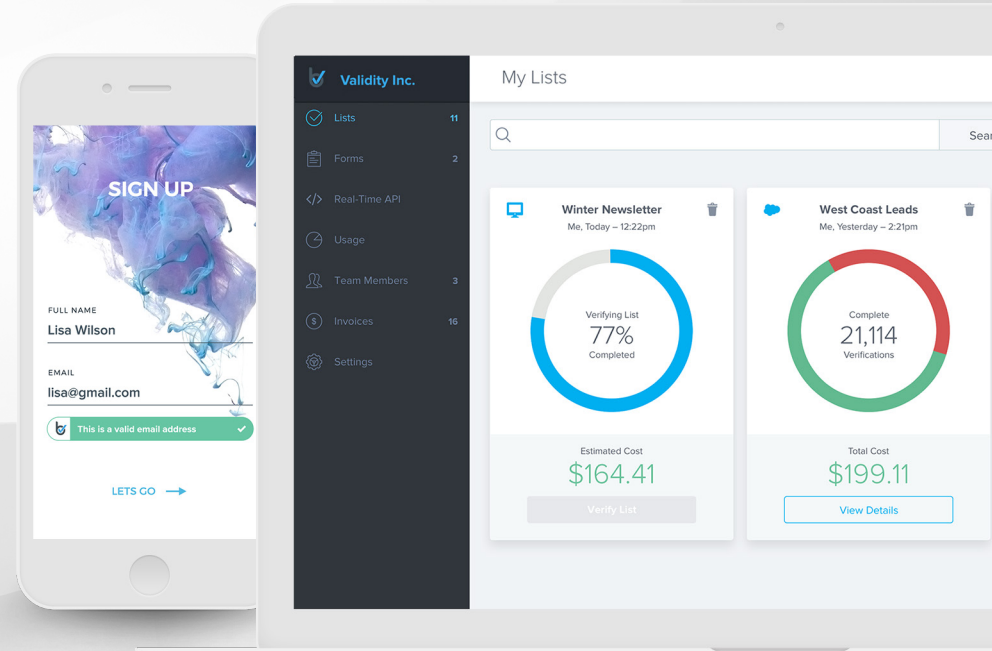

Typo trap and disposable address removal

In addition to removing invalid email addresses, we can detect and remove disposable and typo trap domains for even greater assurance of data quality.

Globally accurate, globally distributed

With hundreds of servers worldwide, geographically aware verification algorithms and global accuracy, we've got you covered no matter where you are.

See what Validity can do for you.
